ScuzzyGraph Color Card for the Macintosh

SCSI based, high-performance, high-resolution, large-screen color graphics controller for the Classic, Plus, SE, and Portable. Each model displays 8 colors and simply connects to the MAC's SCSI port. ScuzzyGraph has the same footprint as a MAC and can be stacked directly beneath the MAC. All are QuickDraw compatible and include installation software, documentation and ScuzzyGraph-to-MAC cable. Installation takes only moments. All models are compatible with any multiscan, VGA or AppleColor RGB compatible color monitor at 640 x 480 pixels, as well as the Apple Portrait monochrome and Aura's 19" monochrome monitor. The model SG/16 is also compatible with Aura's 19" Trinitron color monitor.
